SuiteASSURED

SuiteASSURED is a **fully supported, discrete build** of SuiteCRM, created to provide warranties, support, and total peace of mind for its users.

SuiteASSURED is a separately maintained, tested and product-managed version of SuiteCRM. It is accompanied by a legal agreement that delivers warranties, indemnities, support, and performance guarantees.

The freedoms, quality and innovation of open source with the security, warranties and indemnities of proprietary software.

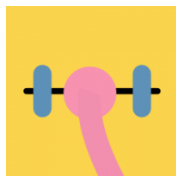

All SuiteCRM Features

- Enterprise Ready
- Established Community
- Fully Scalable
- Multi-Platform
- On-site and Off-site deployment
- Open Source AGPL License

Modules:

Accounts, Contacts, Leads, Opportunities, Quotes, Calendar, Cases, Documents, Emails, Campaigns, Calls, Meetings, Tasks, Notes, Products, Categories, Contracts, Knowledge Base, Report Generator, Workflow, Projects, Invoices (experimental modules removed)

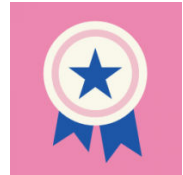

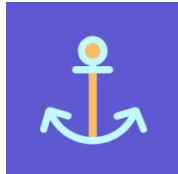

Total Care Package

With SuiteASSURED you get annual Care hours (depending on your number of users). Combined with easily accessible online resources, these hours can be used freely on a multitude of SalesAgility services to empower your teams to drive the most value from the system. Training, user/ technical support, consulting and custom development are a number of services provided by SalesAgility that Care hours can be used for.

Warranties

SuiteASSURED comes with full warranties for the core and custom code delivered by SalesAgility which state that the software is free from significant programming errors and defects in workmanship (quality warranty) so if you discover a bug within your CRM, then we will happily fix it. SuiteASSURED also warrants that the copyrights in the software are owned by or have been licensed to SalesAgility and we have the right to distribute the Software (copyright warranty).

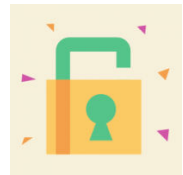

Stable Code Base

Code that is deemed "experimental" is removed from SuiteASSURED leaving only the robust, mature functionality, guaranteeing greater stability.

Enhanced Security

SuiteASSURED is subject to regular vulnerability scanning and penetration testing by the internal product development team and by independent, accredited third party security partners. Vulnerability and penetration testing occurs throughout the development life cycle for all releases; however, SuiteASSURED will always be the most secure version of SuiteCRM.

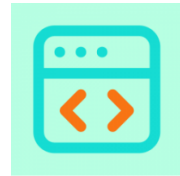

Indemnifications

SuiteASSURED indemnifications include (i) replacing any infringing portion of the software, (ii) modifying the software so that its use becomes non-infringing, or (iii) obtaining the rights necessary for a customer to continue use of the software without interruption.

Patent Protections

SalesAgility are members of Open Invention Network (OIN). OIN is the largest patent non-aggression community in history and supports freedom of action in Linux and Linux-related systems and applications as a key element of Open Source Software. OIN acquires patents and licenses them royalty free to its community members.
